RE: 43 North Fence Approval Request

Mr. Gach

We are in receipt of your request for approval to construct a fence in the rear portion of your property on Lot 19 in the 43 North neighborhood. After review of your proposed location, and materials for the request (as attached) we are granting approval of your request based on the following conditions.

1) Per the 43 North Bylaws Section 6.1.5 allows for fences with prior approval from the Developer.
2) The request is deemed to be a reasonable fit for this section. This approval is granted contingent on home owner to maintain the existing trees and other landscaping, and to provide additional plantings of 2-3 bushes or similar coverage plants along the Hopewell Dr. facing side of the proposed fence
3) The fencing material of commercial grade aluminum fence as submitted is approved.

This approval letter satisfies the prior Developer approval and allows the home owner to move forward with the proposed fencing. If there are any questions or further needs please let us know. I can be reached at jklaasen@jimtibbehomes.com or 616.633.8317

Thank you,

Jeff Klaasen
Wolven Investments LLC as Developer for 43 North

Jeff Klaasen

Jeff, I have attached some pictures. Please note that based on the design someone looking from the front of the house will not be able to see the fence at all. Because of the woods on two of the sides of the fence that area also will not be visible. The only side of the fence that will really be visible is the side from Hopewell as you have identified. There is existing landscaping with trees and extend approximately the first 20 feet along the fence. As you move further down Hopewell the other trees in my lot also provide screening. This seems sufficient to be based on what I see currently in the neighborhood but if you require a few more bushes towards the back corner of the gate side of the fence I would be happy to add them. At this point I would prefer to install the fence to see how it fits into the lot as I believe it will be fairly screened already.

Please let me know if we can finalize a plan today as I would like to make contact with the contractor.

Afternoon Aaron,

Thanks for sending this over. The area that I would most be interested in would be what I believe is the gate side of the fence and how it will look from the street (Hopewell Dr.) Would you be able to send me a picture of what the current landscaping looks like from Hopewell Dr.? Also what your initial thoughts to be able to breakup the fence line from that angle?

Thanks for your thoughts, I appreciate your patience as I work through this!

Jeff

Thank you Jeff. Yes, inside the fence we are looking at installing a hardscape patio at some future date, and regarding the outside of the fence:

- on the gate side of the fence existing landscaping (mulch area and small trees, shrubs, etc) break up the area from the house towards the gate.
-on the garage side of the fence there is a grass area between the fence and woods to form a walk area, but the wood-line breaks up most of that side around to the back of the fence
-the back side and corner areas in the future can accommodate one additional mulch and small tree/shrub area to match the existing landscaping, but we wanted to install the fence first to see how the fence fits into the exhausting wooded area that essentially flanks the fence from two sides, and the existing landscape is on the other side already.

I assure you my wife will make it look nice as soon as we see how it fits into the space, and much of that also depends on the hardscape design and what landscaping will coordinate best.

Thank you! Let me know if you need any further detail, we appreciate a quick turn around!

Good Morning Aaron and Lisa,

Thanks for sending over the fence request below. The site plan and fence materials appear to be in line with what we are looking for. Before I send out the formal letter would you be able to also help me understand any ideas of landscaping to help break up the fence lines.

I should be able to turn this around pretty quickly once I hear back.

Thanks again and have a great day,

Jeff
