RE: 43 North Fence Approval Request

Mr. and Mrs. Mead

We are in receipt of your request for approval to construct a fence in the rear portion of your property to enclose an inground pool on Lot 17 in the 43 North neighborhood. After review of your proposed location, and materials for the request (as attached) we are granting approval of your request based on the following conditions.

1) Per the 43 North Bylaws Section 6.1.5 allows for fences with prior approval from the Developer.
2) The request is deemed to be a reasonable fit for this section. This approval is granted contingent on home owner to maintain the existing trees and other landscaping, and to provide additional plantings along the outside facing side of the proposed fence as submitted on the attached sketch.
3) The fencing material of aluminum fencing similar to that used on the fence for Lot 18 as submitted is approved.

This approval letter satisfies the prior Developer approval and allows the home owner to move forward with the proposed fencing. If there are any questions or further needs please let us know. I can be reached at jklaasen@jimtibbehomes.com or 616.633.8317

Thank you,

Jeff Klaasen
Wolven Investments LLC as Developer for 43 North

Jeff,

I met with Scheidel Pools yesterday to finalize the proposal for our inground pool. He sketched out the proposed layout and I have attached it to this email. We plan to use tall grass on the side of Nathan Sharp's house to block direct pool access along with some small pine trees next to the yard line. We have also decided against black chain link for the fence and will be using an aluminum fence very similar to the Thompsons. On their side of our house we do not plan to add any landscaping as our pool will not we directly visible from their yard.

If you have any question please let me know. If I can not answer them I can direct you to the owner of Scheidel Pools. They have given me a tentative installation of the first week on Aug unless the association needs more time.

As part of the approval process from the Association for a fenced in pool we would like to see a sketch of the pool area, a sketch of your lot showing the location of the fence, the material that the fence would be constructed of and proposed landscaping to break up the fence from the outside view of neighbors. Typically we would want the fence to run no greater than the width of the house to provide better aesthetics from the street view. The normal fencing chosen for a pool area would be the black vinyl chain link and we would be okay with this type of material but would shy away from a bare metal chain link.

Jeff,

I am at 9066 Hopewell dr and my wife and I are in the process of scheduling a inground pool installation. It will have a patio area, be fenced in and have landscaping around it.

I have it sketched out from the installer, but wasn't sure if you needed to see it or needed other information.

Thanks, Michael Mead
